

City of Graham Sewer Use Ordinance

We operate our Grease Program using section 13-72(2)(c) of the Sewer Use Ordinance as follows:

Grease, oil, and sand interceptors shall be provided when, in the opinion of the POTW director, they are necessary for the proper handling of wastewater containing excessive amounts of grease and oil, or sand; except that such interceptors shall not be required for residential users. All interception units shall be of type and capacity approved by the POTW director and shall be easily accessible for cleaning and inspection. Such interceptors shall be inspected, cleaned and repaired regularly, as needed, by the user at their expense.
