

Misty Lynn Harris

Misty Lynn Harris, Pretreatment Coordinator of the Anson County Regional Wastewater Treatment Plant as a winner of the North Carolina Pretreatment Consortium's 2007 Peer Award.

While not involved in Pretreatment for as long as our other nominees, she has made a great impact on her County's Pretreatment Program. Her Supervisor says that she has completely turned around their Pretreatment Program.

She has single handedly implemented a Fats Oils and Grease Program, re-written the Sewer Use Ordinance, developed and implemented a recycling program, and brought the pretreatment program into full compliance with the PERCS Unit. The person who nominated her says "The work she does makes being an ORC a much less stressful position."

She holds a Grade I Wastewater Operators license and is a Grade III Pretreatment Program Specialist.

She has a bright future in the field of Pretreatment and we look forward to her continued participation and contributions to the field of Pretreatment and the North Carolina Pretreatment Consortium.
