

North Carolina Pretreatment Consortium, Inc.

Presented to

Steve Haller
2011 PEER AWARD RECIPIENT

**IN RECOGNITION OF YOUR OUTSTANDING
SERVICE AND DEDICATION TO THE
NORTH CAROLINA PRETREATMENT CONSORTIUM**

He has instituted and administered an exemplary pretreatment program for the City for the past eight years. He can be counted on to perform his duties independently and in a timely fashion. Time after time, the pretreatment auditor reports have contained positive comments and many times comment specifically on his extreme organizational skills.

He has established a great rapport with his industries with fair treatment and his outgoing personality. All the city's industries know what is expected of them and are quick to notify us of issues that may affect our wastewater treatment system. He has a good understanding of our wastewater treatment processes as well as the issues our dwindling manufacturing industry faces day to day. He has worked with our industries to minimize both their effects on our treatment system as well as their bottom line.

He has worked as a wastewater plant operator and obtained his grade IV Operations certification prior to becoming the Pretreatment Specialist.

He has graciously volunteered year after year to teach the Industrial Pretreatment portion of the annual Wastewater Operators Grade II in Raleigh and/or Morganton.

In addition, he has volunteered to serve on various sub-committees of the Pretreatment Consortium Conference Planning committee year after year and has served as a conference co-chair. He also takes a very active role in the safety committee for the city's Water Resources Department. He has taken on the responsibility of being the chair of both the Accident Investigation as well as the Process Safety Management sub-committees. In Addition, he has, in the past taught the CPR/First Aid classes for city employees.

...Now, if he would just learn how to swing a golf club!
